

Leave Indiana's current Law of preventing unwanted solicitation phone calls into my home, alone. The FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections. The privacy has allowed my family to use the phone the service we pay for in the matter in which WE choose (which is not to answer unwanted calls). I used to receive 12 calls per afternoon, on my caller-id alone, of solicitation calls. Now I receive 1 possibly a week.
